

Case Management: invest in health

When employees are off work for any extended period of time due to illness or an accident, it can be a difficult situation for all concerned. We therefore offer affiliated companies comprehensive Case Management services.

Case Management is a way of investing in the health of your employees. It allows data on absences due to illness or injury to be collected and analysed quickly, meaning if any intervention is required on your part, you are able to take the right course of action as swiftly as possible. In this way, you can ensure that

your employees receive the best-possible support while they are off work and help them to reacclimatise more quickly after a long-term absence. With Case Management, you will not only save money, but also avoid losing qualified employees and diluting the experience of your workforce.

Our offer at a glance

Absence management

- Capture and analyse absence data and compile reports using a single web-based tool
- Take preventive measures in the case of conspicuous absences within 30 days
- Triage carried out on a case-by-case basis with regular assessments of your absence quota

Case Management
